| BJCE-71 | 1800 IN           | 17/03/2021     | 12:44 PM       | Bannister               | Operation Complaints: Noise | Elizabeth Picker                | Complainant was concerned about a 'surging' noise coming from the direction of wind farm between approximately 11am and 1pm. The noise settled down after 1pm. | <ul style="list-style-type: none"> <li>- The complainant was contacted within 2 hours of reporting the noise to discuss the noise complaint. The complainant provided information about the noise experienced.</li> <li>- Details of the complaint were passed to the technical team for investigation. The team reviewed the wind conditions on 17/03/2021, including the time(s) provided by the complainant. The technical team found no evidence that the turbines were noisier than normal, however, wind conditions had eased slightly at the the time the technical team investigated.</li> <li>- Results of technical team investigation were communicated to the complainant.</li> <li>- The complainant was informed that the team would continue to monitor the wind turbines for any unusual noises and if anything out of the ordinary was identified, they would be in contact.</li> <li>- As the 'surging' noise could not be identified and there was no evidence the turbines were noisier than normal, the complainant was informed that the complaint would be closed. The complainant was advised to contact the wind farm if they could hear the 'surging' noise again.</li> </ul> | Yes                            | Leo Pearce, Asset Manager |

| BJCE-69                        | 1800 IN           | 18/02/2021     | 8:26 AM        | Grabben Gullen          | Operation Complaints: Noise | Elizabeth Picker                | <p>Complainant was concerned about noise disruption from wind turbines, especially when there was wind blowing from an easterly direction, with cooler temperatures. Experiencing disturbance, including sleep disturbance on multiple occasions during and leading up to February and March. The noise was described as a 'constant rumbling' and 'pulsating'. Complainant requested double glazed windows on his house or the wind turbines to be shut down on nights with an easterly wind.</p> | <ul style="list-style-type: none"> <li>- The complainant was contacted to discuss the noise complaint.</li> <li>- Details of the complaint were passed to the technical team for investigation of the circumstances at the time of complaint. The team reviewed the wind conditions on the dates and times provided by the complainant. The technical team found no evidence that the turbines were noisier than normal. Results of technical team investigation were communicated to the complainant (including wind conditions and operation of turbines at the complaint times).</li> <li>- Explained to the complainant the process that has been completed for Operational Noise Compliance Testing when the wind farm first started operating. The team explained that this noise monitoring showed that the noise generated was within allowable limits. The monitoring report is available on the project website and the team offered to post a copy to the complainant.</li> <li>- The complainant was advised that the Project does not have a program that offers double glazed windows to residents to mitigate the effects of wind turbine noise. The Clean Energy Program provides grants that can be used to improve energy efficiency of resident's homes (which could include the installation of double glazed windows). However, the complainant has already benefitted from this program and multiple applications to the program are not possible under the current guidelines.</li> <li>-The complainant was informed that the team would continue to monitor the wind farm when easterly winds are blowing and if anything out of the ordinary was identified, they would be in contact.</li> <li>-The complainant was provided with the details of the National Wind Farm Commissioner, the NSW Department of Planning, Industry and Environment, and the Environmental Protection Authority.</li> </ul> | Yes                            | Leo Pearce, Asset Manager |
