Subject: Decommissioning Environmental Management Plan Review

Dear Ms O'Reilly,

Gullen Range Wind Farm (GRWF) Project Approval (Application No. 07_0118 MOD 1) Condition 7.7 requires that the approved Decommissioning Environmental Management Plan (DEMP) be reviewed every 3 years after the 30th June 2016.

The GRWF DEMP was reviewed on the 30th September 2019 and only very minor items were identified for updating. As the DEMP was prepared by an independent consultant and the updates identified are relatively minor, it has been determined to identify the updates in this letter and attach it as a cover letter on the DEMP.

The following updates were identified during the review of the DEMP:

- **Section 1 'BACKGROUND' (3rd paragraph)** – New Gullen Range Wind Farm Pty Ltd is wholly owned by Beijing Jingneng Clean Energy (Australia) Holding Pty Ltd.
- **Figure 3-1 GRWF Project Organisation Chart** – Goldwind (Capital) is removed from this figure.
- **Figure 3-2 Indicative Decommissioning Organisational Structure** - Goldwind (Capital) is removed from this figure. Biala Wind Farm is currently under construction and may need to be included in this figure at the next review.

The DEMP and sub-plans will require further updating prior to decommissioning. The sub-plans were not updated at this review. This is consistent with the DEMP which states in Section 1.2.1 the requirement to update the sub-plans prior to decommissioning and Section 1.3 which states that the specific sub-plans will be prepared once decommissioning timing is confirmed.

Kind regards,

Leo Pearce
Asset Manager
